

More than 950 million people around the world need glasses but can't afford them or don't have access to eye care. This has serious consequences for the people affected, as well as for their countries and their economies.

GoodVision Glasses

The **GoodVision Glasses** consist of a light, flexible and stable **spring steel frame** with pre-ground **spherical lenses made of plastic**.

The frames are prefabricated at our production sites in Latin America, India or Africa. We have sold over **500,000** pairs of glasses worldwide since the EinDollarBrille association was founded.

Prefabricated frames from the starter pack

The modular system

Flexibel: Lens thickness variables selectable for each eye.

Simple: Insertion of the lenses without tools by click mechanism.

Fast: Individually fitted glasses ready for immediate use.

Stylish and affordable: GoodVision Glasses

Our glasses for your project

Are you active in a project or in an organization that would like to include the care of people with defective vision in its own work?

Then you can get prefabricated frames and lenses in various diopeters **at cost price** in the course of a **partnership** with EinDollarBrille association.

The starter pack for your project

What's included in the **starter pack**?

- **500** frames in sizes S, M, L.
- **1,200** glasses with -6.0 to $+6.0$ Diopters (in 0,5 diopter increments).
- Information material (videos on how to adjust the frames, manuals for performing eye tests, etc.).

Success factors for your project

- They have certified staff to perform eye tests.
- You will be able to obtain the necessary permits (import, sale, eye tests, etc.).
- You secure your project work through local partnerships and a stable local network (e.g. to health centres, schools, etc.).

What's next?

If you would like to carry out your own project, we look forward to receiving your e-mail: **partnership@goodvision.org**
